Launching this game reminded me of counter strike as I was blasted with loud music. Luckily the options menu was very easy to find to turn that down. Once I had it down I had time to enjoy the simple and good looking main menu. This app company did a great job with this and it was super easy and aesthetically pleasing to navigate around the game. In my short time playing, I got pretty good at it and only found two small problems. The first might be a feature, but I found it annoying to switch directions twice and get stuck in place. It's a small complaint and it doesn't matter that much but I wanted to mention it anyways. My second problem was the sounds used for leveling up in both game modes. Both sounds are ripped from Counter-Strike Global Offensive, it first plays the case opening noise than the sound just before a death cam in deathmatch. Other then this I had a great time playing and I would recommend this to anyone who has free time on their hands. Geometry Rush is super smooth and plays out great with it's simple but eye catching art style.
